UNEP Copenhagen Climate Centre (UNEP-CCC)

- Collaborating Centre for UNEP, fully aligned with UNEP's Strategy
- Over 30 years of experience in working with developing countries
- Provision of support in various areas: Energy Efficiency and Planning, NDC Development and Implementation, Mitigation Analysis, Adaptation, Article 6 Readiness

## Focus Areas

Policy   Transparency   Implementation

UNEP-CCC Support to Reporting on Article 6

- Several projects to support countries on Article 6 and Article 13, and their intersection

Key Projects at UNEP-CCC

Art.6

Supporting Preparedness for Article 6 Cooperation

(SPAR6C)

Art. 13

Capacity-building Initiative for Transparency - Global Support Programme

(CBIT - GSP)

Reporting on the use of cooperative approaches in Biennial Transparency Reports

Supporting Preparedness for Article 6 Implementation (SPAR6C)

Supporting Preparedness for Article 6 Implementation (SPAR6C)

National and global support activities provided by SPAR6C
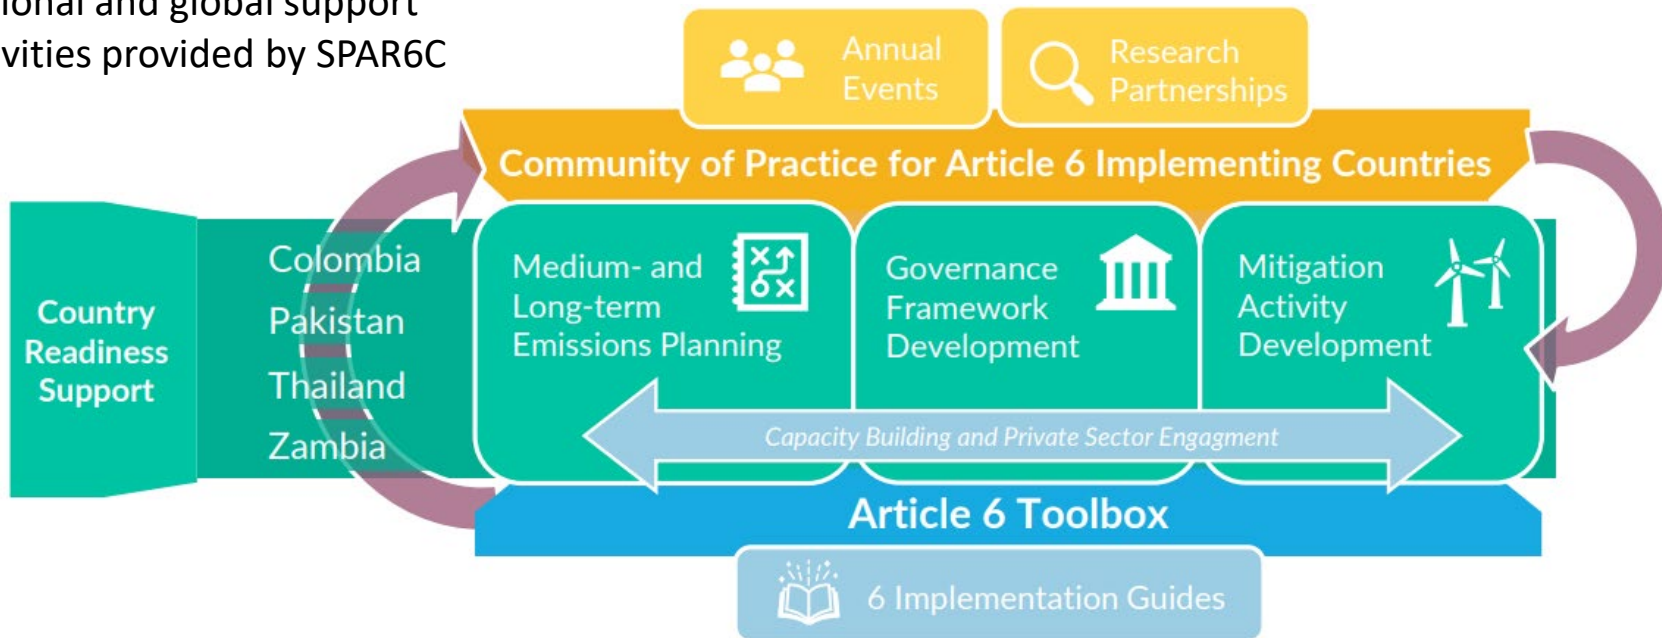

SPAR6C: In-Country Support Activities
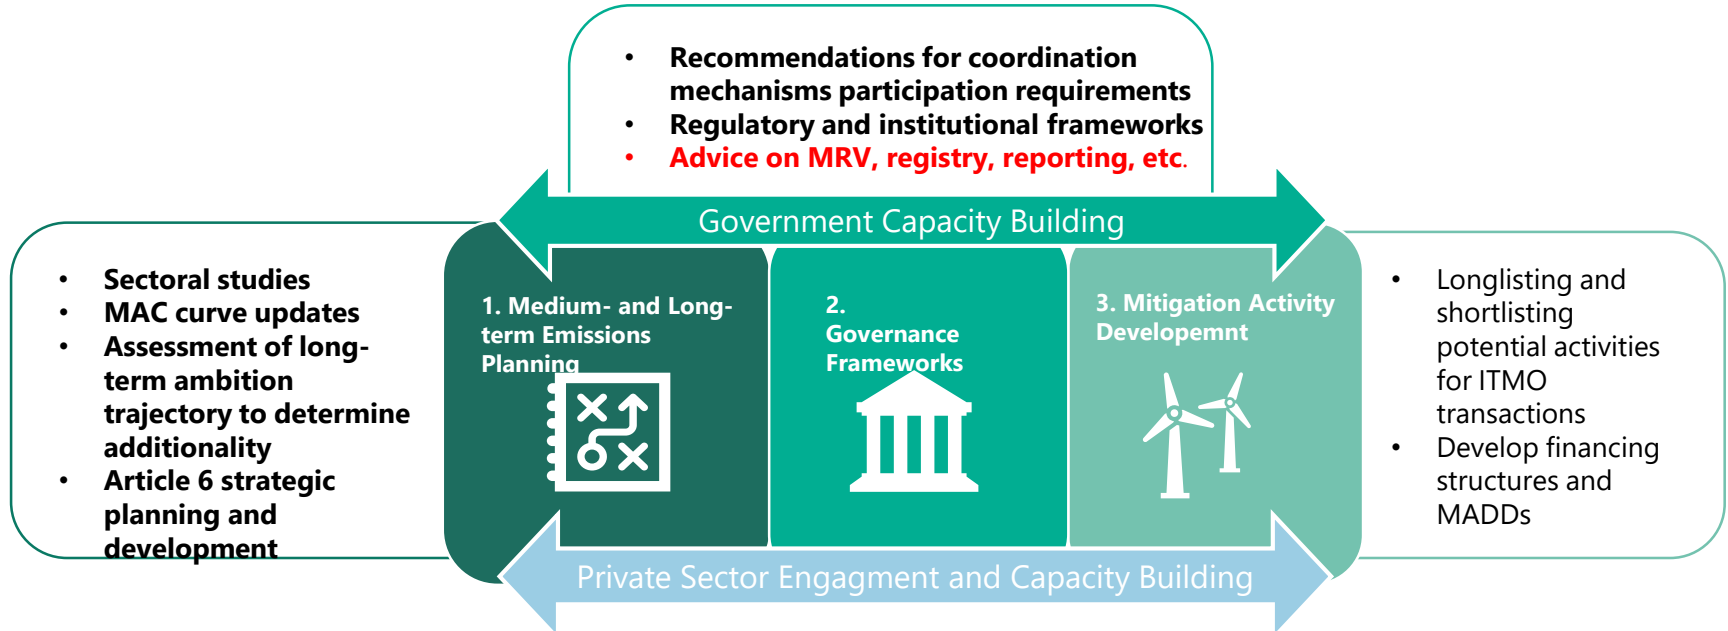

SPAR6C: Article 6 Toolbox

1. Medium- and Long-term Emissions Planning

2. Governance Frameworks

3. Mitigation Activity Developemnt

6 Guides and Handbooks

Creating an A6 strategy — Prioritizing opportunities and managing risks

Creating a host country governance framework — Setting institutional arrangements and procedures

Developing A6 pilots and transactions — Guide for project developers and other stakeholders

Increasing ambition and promoting transforma-tional change — How to support increased ambition and lasting impact

Integrating A6 with other carbon pricing instruments — No conflict with ETS, carbon tax or other CPI's

Contractual options and models for disbursing carbon finance — Engaging the private sector and climate finance providers

First versions under development, with iterative development throughout the project to reflect lessons learned

Capacity-building Initiative for Transparency – Global Support Programme (CBIT-GSP)

- Global transparency support project, funded by GEF, implemented by UNEP and executed UNEP-CCC, from 2022 to 2026 (~ 9 mio USD)

- Merging and continuation of CBIT Global Coordination Platform and the UNDP/UNEP Global Support Programme
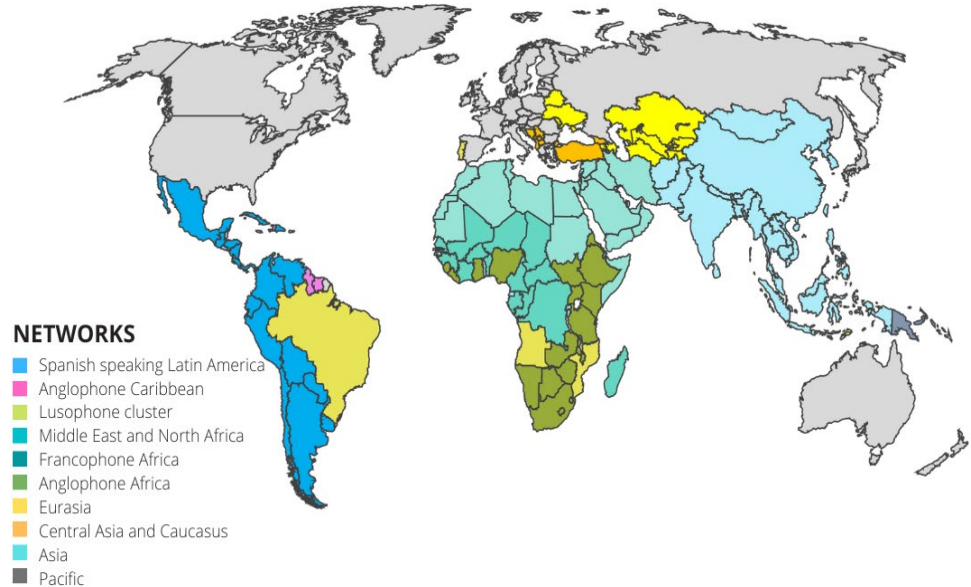

Objectives
- Support countries in the transition to the BTRs
- Assist countries to submit NCs & the last BURs
- Provide a one-stop-shop for transparency
- Mainstream gender considerations

CBIT-GSP Support Modalities

Main Mediums of Support

- Regional Transparency Networks
- Direct Support to Countries in Prioritized Areas
- In-Country Trainings & Activities
- Regional and Global Workshops
- Quality Review of Transparency Reports
- Updated Gender Toolkit
- Knowledge Products

Regional Transparency Networks

NETWORKS
- Spanish speaking Latin America
- Anglophone Caribbean
- Lusophone cluster
- Middle East and North Africa
- Francophone Africa
- Anglophone Africa
- Eurasia
- Central Asia and Caucasus
- Asia
- Pacific

UN environment programme | copenhagen climate centre

CBIT-GSP Integrated Platform: One-stop shop for transparency

Objective

Up-to-date information about all transparency projects, countries' transparency reports, transparency knowledge resources

One-stop-shop for transparency, owned by all transparency stakeholders

Up-to-date information on events, webinars, and calls for consultants on climate transparency

Place for peer-to-peer exchange on climate transparency issues, driven by the transparency networks

**Platform currently under development
→ Launch during the SBs in Bonn**

Main Features

- Country profiles and pages for all agencies and transparency support providers
- Dedicated space for Regional Transparency Networks, incl. a Forum
- Global Forum, Country Support Page etc.

Ongoing BTR Projects

BTR submission In progress

COUNTRY DETAILS
Including details on # of submitted climate reports, calls for consultants, upcoming or recent events, GHG emission trajectories, etc.

ONGOING PROJECTS
Information on all ongoing transparency projects (CBIT, enabling activities and other transparency projects) with links to each project page.

SELF-ASSESSMENT
Detailed information on the results of last self-assessment, results of self-assessment over time, and comments from the country focal point.

REPORTING
Information on UNFCCC national reporting docs, NDC, LTs and other climate change related documents. State of transparency information.

CBIT-GSP Status

- Launch of six Regional Transparency Networks (two networks already in place with UNDP, two more to launch)

- Nomination of thematic focal points in countries

- Capacity needs assessment conducted in countries of the six networks to identify priorities and needs → Several countries showed interest in support for reporting on Article 6 (e.g., Lao PDR and Malaysia)

- Work plans for 2023 developed in each of the networks

- Article 6 support activities to be covered the future

Countries can ask for specific transparency support through a support request template at any time

UN environment programme | copenhagen climate centre

Other Article 6 Projects at UNEP-CCC

Development of Carbon Market Transformational Change Tool, under the Initiative for Climate Action Transparency (ICAT)

- Develop self-assessment transformative impact templates for carbon market project/programme developers

- Develop the reporting format and guide for Article 6 purposes to safeguard environmental integrity and allow for NDC ambition raising. This will be integrated with NDC tracking as per Enhanced Transparency Framework requirements.

Integrated Assessment for Article 6 (upcoming)

 - Develop a toolbox with technical modules developed for integrated assessment for Article 6 readiness building on existing international methodologies, tools, and datasets for analysis of mitigation costs and potential, policies and project development, dynamic baselines, iterative stakeholder engagement and impact assessment aligned with MRV/transparency and transformational change approaches to a just, sustainability transition.

- The toolbox will build on Costa Rica's open-source Climate Change Metric System (SINAMECC) and its Climate-Land-Energy-Water (CLEW) modelling platform, among other publicly available resources and draw on standardised data structures such as GHG inventories and REDD reference levels.
